SUMMARY

Analytical and detail-oriented professional transitioning into software development after 5+ years in dynamic startup environments. Experienced in managing cross-functional projects, solving complex problems, and communicating effectively with technical and non-technical teams. Skilled in JavaScript, React, and Node.js, with a strong foundation in computer science fundamentals from Harvard's CS50x. Passionate about building scalable, user-focused web applications and contributing to collaborative, fast-paced development teams.

SKILLS

Languages: JavaScript, TypeScript, Python, HTML, CSS, SQL

Technologies & Tools: React, NodeJS, Vite, Express, MongoDB, Jest, Git, PostgreSQL, SASS, TailwindCSS, Bash, Ubuntu terminal, pgAdmin4

PROJECTS

Message Board App – Github

- Full stack app designed using react/vite and node.js and MVC pattern.
- Uses axios and to pull messages with no-refresh rendering and REST API calls.
- Uses date-fns library and react query to automatically update message time sent.
- **Skills used:** React, JavaScript, vite, node, Tailwind, axios, PostgreSQL

CV Application Resume App – Github

- Resume application where users can enter their contact info, experience, and education.
- Uses React components to optimize code re-useability and responsiveness.
- **Skills used:** React, JavaScript, CSS

Pokemon Shopping Store App – Github

- Designed a stateful, front-end, back-end, multi-page app using React router
- Pulling data from pokeAPI with no-refresh rendering leveraging async/await to populate small amounts of data on user's screen for a faster user experience.
- Structured components for ease of scalability, ease of refactoring, and code maintainability.
- **Skills used:** React, JavaScript, CSS, API, SASS

EDUCATION

100Devs | Technical coding bootcamp covering front-end development, Data Structures & Algorithms, and testing

The Odin Project | Comprehensive online course. HTML, JavaScript, React, Testing, database

Harvard CS50x | 11-week course – memory, data structures, algorithms using C and SQL

Bachelor of Business Administration | Wilfrid Laurier University | Waterloo, ON

PREVIOUS EXPERIENCE

Senior Financial Analyst, TouchBistro (SaaS) | Toronto, ON

2024 – present

- *Analytical skills & Internal/External stakeholder communication:* Manage financial model and assist in making recommendations to CFO and CEO.

Senior Analyst, Greentank Technologies (cannabis startup) | Toronto, ON

2020 – 2024

- *Analytical skills & Internal/External stakeholder communication:* Created 5-year financial forecast model and lead due diligence meetings with c-suite leaders, investors, and bankers to explain assumptions and outputs. Resulted in USD\$23.5M bridge and series B funding and USD\$5.0M R&D service revenue.
- *Cross-department collaboration:* Prepared and lead budgeting process, organized meetings with department heads. Managed USD\$9.5M budget & reforecast and maintained departments to within 10% of budget.
